

The Original all aluminium remote controlled golf trolley !

The new DYNA STEER 2000 is constructed with aircraft grade aluminium for extra durability and strength and is supplied with the hand held KADDY LINK remote control unit allowing you to play golf the way that it was meant to be played. You can strike the ball, pace your distance and enjoy the freedom of walking off the tee without coming into contact with your trolley or your bag. You'll be surprised how much better you will play when you maintain muscle control, balance and body symmetry throughout the entire game, when you do not have to push or pull a cart.

The KADDY LINK remote control system allows you to have complete control of speed, turning, full dynamic braking and stop/start functions and allows multiple users in the immediate vicinity to operate their kaddys without interference from other users

The soft touch control pad on the handle features a speed controller, 4 preset distance settings, battery condition indicator and a keyless anti-theft security code function.

This model is power driven by the superior Sonnenschien battery renown for long life and dependability. Each Kaddy also comes with a specially designed 3 stage charger for quick and accurate charging.

The DYNA STEER 2000 KADDY and KADDY LINK provide you with the most advanced and sophisticated system in the market today.

The hand held remote control allows you to steer as well as stop and start your kaddy.

There is also a comprehensive set of controls on the kaddy's handle.

The additional hill tamer wheel provides extra stability.
